

FILTER Line
Pre-Filters

MANN+HUMMEL

FILTER Line for UF, NF & RO Pre-Treatment

Water Treatment is a Multi-Step Process

With feed waters sources ranging from surface to well water, from brackish to sea water and the many varieties of wastewater, membrane technologies need pre-filtration to work at highest efficiency and maximum service life. The FILTER Line is offering high performance pre-treatment products, that can be seamlessly integrated with your water treatment concept.

The FILTER Line includes:

1. Cyclon Filters
2. Strainers
3. Self-Cleaning Filters
4. Bag Filters
5. Cartridge Filters

Private labeling options are available.

Reliable solutions for water treatment projects

The FILTER Line is designed to operate with low pressure loss, while providing high flow rates and dirt holding capacities. Multiple configurations are available to match your requirements. The products are made in Europe with top quality European materials.

MANN+HUMMEL Water & Fluid Solutions

Our portfolio covers the full water treatment spectrum – Pre-Filtration, MF, MBR, UF, NF, RO, as well as process & specialty solutions. Let us support your engineering with an integrated technical projection.

FILTER Types	Construction	Performance	Notes
Backwashable Filters	Housings in PA, FRP, SS316	Filtration gradients 50-800 µm	All feed water types Individual component, or integrated skids available
Bag Filters & Housings	6" & 7" , PP & PA	Filtration gradients 1-800 µm	
Cartridge Filters & Housings Standard + Custom Design	String wound, melt blown, pleated, washable All lengths	Filtration gradients 0.1–100 µm End cap types DOE, C2-3-7-8
